

# Culvert Sales

If you are looking to do some road construction or upgrading existing roads on your woodlot, then you have come to the right place to find the culverts you are looking for. We carry a huge selection of plastic/polyethylene culverts for forestry road use. Presently we have in stock 6" - 48" in diameter and 10'-30 foot lengths. Most of our culverts are rated at 210kPa with the exception of our 6" - 10" which are rated at 320kPa. If you are looking for any particular size or grade that we don't have in stock, we will get it in ASAP for you within a couple days. Are prices are hard to beat and we have bee told we are the best prices around. Call us toll-free at 1-888-762-1555 anytime to check on our inventory and check on our low, low prices.

Do you have a very wide road or need to join several culverts together for a drainage project on your woodlot? We carry types of plastic couplers both bell and split couplers, depending on the size of the culvert.

Do you need to go around a turn or a sharp bend and can't bend the culvert properly? We carry both 45 and 90 degree couplers as well. These are specialty items and we don't carry a lot of them so please call ahead to give us ample time to make sure we have it for you, when you need it.

If you are installing a culvert in a stream on your woodlot then more than likely you will need a permit from the Department of Environment (D.O.E.) to install it. To get a permit can sometimes take up to 2-3 months depending on the time of the year and their backlog. SNB has Certified Installers on staff, that can provide you with a permit within a couple days! We will properly size the culvert for you, inform the D.O.E. that we will be installing the culvert and then provide you with our professional installation services to ensure the culvert is installed properly to meet our and the D.O.E. standards. The permit costs \$25 and our services are charged out at a rate
